

ABSTRACT OF THE DISCLOSURE

A composite fabric includes a fabric layer and a backing laminate which is composed of a binder layer applied to the fabric layer, an intermediate layer applied to the binder layer, and a surface-modifying layer applied to the intermediate layer. The binder layer includes a binder composition which contains a styrene-butadiene-styrene block copolymer grafted with an acrylate monomer, and polyurethane blended with the styrene-butadiene-styrene block copolymer which has been grafted. The intermediate layer has a composition, which contains styrene-butadiene-styrene block copolymer. A method of producing the composite fabric is also disclosed.
